

Hydra Stone GL™ is becoming

www.bwpcs.com

America's most-successful

www.bwpcs.com

basement waterproofing system, EVER!

We know that one very important factor to a succesful system is to maximize the hydra flow. Imagine if this were rock in this trench, it would actually be blocking 100% of the space it takes! Hydra Stone GL™ maximizes the all important hydra flow.

Hydra Stone GL™ not only eliminates the potential for biological hazards associated with gravel, but also eliminates the moisture content of two to three tons of gravel in each property. At the same time, it doubles the hydra flow. When the Hydra Stone GL™ waterproofing system is put to work, the hydra flow is superior to rock by 100%!

Basement Systems LLC
